DETAILED ACTION

1. This office action is in response to application 10/650,296 and pre-appeal brief request for review filed on 11/14/2005. Claims 1-18 remain pending in the application.

EXAMINER'S STATEMENT AS TO THE REASONS FOR ALLOWANCE

2. Claims 1-18 are allowed over the prior art of record. The new arguments present in pre-appeal brief request for review have been persuasive.
3. The following is an examiner's statement of reasons for allowance: as to claims 1 and 10, the prior art of record does not teach or fairly suggest a method and a computer program product for cell placement and clock tree synthesis comprising the steps of identifying critical paths in an IC design; then the IC design is partitioned into a timing group for each of the identified critical paths, wherein each timing group includes only critical paths (the critical paths are defined as in the remarks of pre-appeal brief request for review filed on 11/14/2005); then assigning each flip-flop in a critical path to a timing group corresponding to the critical path; then performing a cell placement to minimize a function of propagation delay and maximum distance between flip-flops within each timing group; and finally constructing a clock sub-net for each timing group. Note that partitioning the IC design into a timing group for each of the critical paths means that partitioning the IC design into timing groups. Therefore, the claimed objection as in the final rejection has been withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
